## Chana

Ages and Stages Outcomes-Term 4

May 27, 2005

Summary: Six infants and toddlers are currently enrolled in the Chana Child Development Program. There are three boys and three girls of whom 3 are Caucasian, 2 are Hispanic, and one is Black. Age breakdown: 6 months, 7 months, 2 @ 20 months, 24 months, and one 3.5 years.

All six parents were assisted in the completion of an Ages and Stages Questionnaire. Three were recently enrolled in the program and this was the only screen available. Results:

6 month ASQ summary	Score		Cutoff
	Child 1	Child 2	
Communication	25	35	25
Gross Motor	50	40	25
Fine Motor	55	50	25
Problem Solving	50	50	25
Personal-Social	45	45	25

- Both of these children are from Spanish speaking families. The mothers filled out an ASQ form that is a Spanish translation. I assisted them using an English version. I agreed with the parent's scoring. Child #1 has only been in our program for about one month and has very recently arrived from Mexico. He is showing a low communication score at this time, right at the cut off point, but I expect to see a much higher score when we do our first assessment next August or we will be making a referral at that time. He is enrolled in an enrichment program during the summer.
- The child shown below is making strong progress in his communication attempts and his ability to make his wishes known since entering the program in February. Strategies used to help him included work with picture books getting him to identify objects by pointing to them when asked, we say the word and ask him to repeat words to us. We include him in give and take conversation during diapering, eating, and at play. He is very clear in the words he does have, about 15+, such as book, ball, bottle, eat, block, and he babbles a great deal and ends with something very clear such as "go to school." He really understands conversation and is working towards clarity. He also is enrolling in a summer enrichment program (EHS).

20 month ASQ summary	Score	Cutoff
Communication	40	36.3
Gross Motor	60	36.2
Fine Motor	55	39.8
Problem Solving	55	29.9
Personal-Social	60	35.2

Three children were enrolled for the entire school year and we were able to do an entrance and exit ASQ Questionnaire.

ASQ summary		Score		Cutoff	
	12 month	20 month	12 month	20 month	
Communication	55	60	15.8	36.3	
Gross Motor	55	60	18.0	36.2	
Fine Motor	50	60	28.4	39.8	
Problem Solving	55	60	25.2	29.9	
Personal-Social	50	55	20.1	35.2	
	A 11

Problem Solving	60	60	38.6	25.0
Personal-Social	60	50	38.7	25.0

Scores 2- and 3=

• The scores indicate these children are performing well within the normal range with no concerns at this time. The scores remain fairly consistent between the first and final screen for the 2004-05 school year with no significant drops that would indicate a concern or watch.

Four of the six children are expected to return for the 2005-06 school year.
